

Milk Distribution SaaS - v7 Implementation Guide

Screen-wise Specifications, User Stories & Acceptance Criteria

Admin Dashboard

Modules: Dashboard, Verification Queue, Customers, Distributors, Products, Billing, Deliveries, Notifications, Settings. Acceptance Criteria: Admin can approve/reject distributors, monitor subscriptions and view platform KPIs.

Distributor Dashboard

Modules: Overview, Customers, Products & Pricing, Delivery Slots, Subscriptions, Delivery List, Billing, Reports, Settings. Acceptance Criteria: Distributor can complete setup, onboard customers, manage subscriptions and billing.

Customer Dashboard

Modules: Find Distributor, Active Subscription, Orders, Billing, Notifications, Profile. Acceptance Criteria: Customer can subscribe, pause deliveries, request extra milk and view bills.

User Stories

As a Distributor, I want to define pricing based on milk type and fat percentage. As a Customer, I want to pause deliveries before cutoff time. As an Admin, I want to approve distributors before they go live.

Subscription Engine Rules

Daily, Alternate Day, Weekdays, Weekly, Monthly. Future: Custom schedules and vacation mode. Cutoff: Requests must be submitted before configured advance notice window.

Delivery Engine Rules

Generate daily delivery list from active subscriptions. Apply pauses and extra milk requests before billing.

Billing Rules

Bills are generated from delivered quantities. Extra quantities increase totals; pauses reduce totals.

QA Test Cases

Registration, Login, Distributor Setup, Customer Discovery, Subscription Creation, Delivery Generation, Billing Validation.

Database Overview

Users, DistributorProfiles, CustomerProfiles, Products, Pricing, DeliverySlots, Subscriptions, Deliveries, Bills, Payments, Notifications.

API Checklist

Auth APIs, Distributor APIs, Customer APIs, Subscription APIs, Delivery APIs, Billing APIs, Notification APIs.

v8 Recommendation

Create a complete enterprise product book with detailed wireframes, ERD diagrams, API contracts, role-permission matrix, sprint roadmap, release plan and investor-ready business model.
